SUMMARY

Hi, I'm a junior web developer looking for a role as a full stack web developer. Passionate about building web applications.

I consider myself a creative person and I am doing creative work

SKILLS

- **Languages**: javascript
- **Frontend**: Html, Css, Sass bootstrap
- **Backend:** Node.js express.js
- **Libraries**: Next.js, ReactJs
- **Databases**: MongoDB
- **Soft skills**: Communication,Creativity, sincere advisor

In a developer role at your company, I will:

- I'm a full stack developer and my main focus is frontend. I also understand the back end and will continue to learn and my goal is to do so with passion.

TECHNICAL PORTFOLIO

My Pokemon   Demo | Github   This application has multiple pages, external Api , Axios and so on.
- Tech stack: React, Axios, Modal
- Description: I used pokemon Api through Axios and made multiple pages. Here no more than 1 component per file. Each component file has a css file. Easy to understand and readable.

EDUCATION

Astrum IT Academy - Currently, I'm studying atAstrum as a fullstack developer november-2021 ---- now
